# ROCK HILL CAMPUS

## ENROLLING NOW!

Arclabs instruction offers programs that produce skilled, confident and employable welders. With a “no fluff” approach to learning.

**Students spend 95% of their time in the welding lab, building the skills to succeed.**

### NEW FACILITY

Arclabs - Rock Hill is a destination location for students seeking to learn the most advanced welding processes. On campus you will find our fully equipped welding lab, a classroom with virtual reality welding simulators, and full suite of administrative support including career placement services.

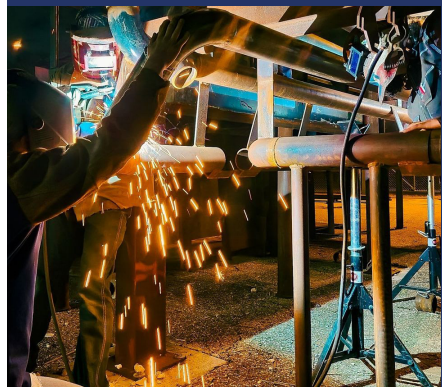

The 18,000 sqft lab includes individual booths with advanced welding machines, pre-beveled coupons, and space for simulating a real job site environment. All sourced to ensure students benefit from the best in modern welding instruction.

### ABOUT US

After decades of hiring welders for all facets of industry, Gene Crook founded Arclabs in 2009 to provide accelerated welding training to directly address the needs of local industry. His years as an employer of welders gave him unique insight into industry's true needs. Arclabs was designed to make welders with the skills employers demand, which is not just about making slick welds.

**Arclabs focuses on developing “employees”... that can weld .**

- ✓ State of the art equipment
- ✓ Instructors with deep industry experience
- ✓ Job specific welding training
